Backyard Babies behind Prolyte barriers

During a concert in the "Kulturbrauerei" in Berlin, Prolyte barriers were used to protect the performing bands, Backyard Babies and Danko Jones, from an enthusiast crowd. The Prolyte barriers are designed as audience control system and are able to withstand the force of a pressing crowd, thereby securing both the audience and security personnel.

Roof Seminar at CAST

On both April 22nd and 23rd CAST will organise a Roof Seminar in Hagen. These roof seminars will answer all your questions with regard to practical details, safety and regulations for roof systems. Among other topics, attention will be given to: The Upgrade Kits for MPT roof system and Connecting your stage support system to the roof system.

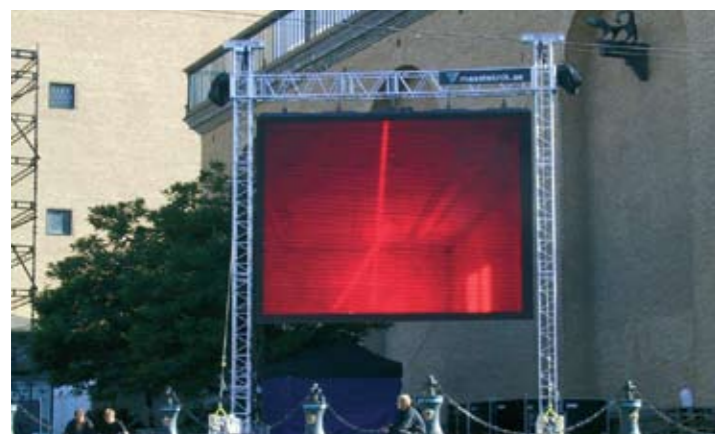

For more info please visit www.castinfo.de

Smart Video Support

Fischer has developed the Smart Video Support, a support structure for LED Screens. The construction exists of a modular stage surface from Prolyte Stage DEX combined with an EASY Frame B base of 6 x 2 m, with maximum stage height of 1,49 m. On top of this stage a truss structure of Prolyte H30V truss is erected. The truss structure remains below a construction height of 5 m., which excludes the structure from regular model approval. For indoor applications, larger constructions can be realised. A static proof of the application for indoor as well as outdoor use is included with the system.

Key-Features

- Low installation surface
- Construction height remains below 5m, a "Baubuch" is not required
- Low transport volume
- Short construction time
- Includes fall protection for operating staff

Prolyte Theatre Products

New developments for the Prolyte Theatre Product range reflect the unique Prolyte approach to combine unrivalled technology with a personal touch.

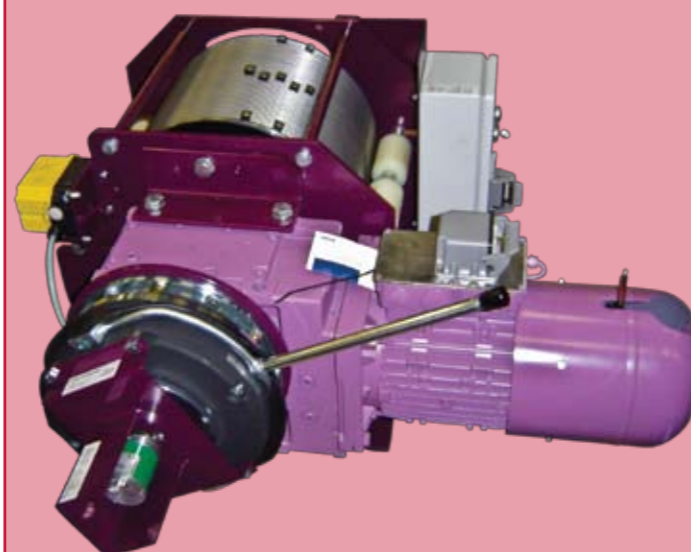

Prolyte has teamed up with two expert companies that will consolidate its profound product knowledge and support for applications in theatrical environments.

Alliance partners Silicon Theatre Scenery and Silk both have a wealth of practical experience in theatrical solutions and settings. Relying on their shared knowledge, Prolyte, STS and Silk are able to translate the special technical requirements of the theatrical environment to comprehensive solutions.

Full range of drive systems and winches available

Apart from its existing programme of Theatre Products, like the Protrac, Truss and Staging solutions, Prolyte is now able to offer a full range of drive systems and winches. Whether permanently mounted or based on modular and mobile installations, from simple, stand-alone systems or single line winches, to complete fly-walls or theatre installations, Prolyte offers solutions that fit best to your situation.

These full-fledged possibilities are completed with a range of control systems, straightforward and reliable, incorporating SIL 3 safety levels where needed, complying to EU standards.

With over 4 new product releases, Prolyte is ready to face a busy Prolight+Sound exhibition.

The Prolyte sales team is set to give you a small tour in the stand to highlight the new and existing product or to share a drink and some business gossip.

Prolyte Space Roof

A modular roof system unlike any before.

Prolyft Mark III

The new release of the Prolyft hoist, updated to an even better performance!

Prolyft Controllers

A new range of high-end but very affordable controllers.

Prolyft Rigging Hardware

Offering one-stop-shop convenience by supplying a complete range of rigging hardware.

Prolyte Theatre Products

New approach for the theatre market kicks off at the P+S show.

Please feel invited to join us in Hall 9.0 stand E71!

Prolyte releases the Prolift Mark III

How to improve the best?

Prolift hoists have a sound track record for reliability and low service requirements. The unique Prolift dbase not only allows you to follow the detailed service history, it also offers online insight in the hoists reliability and safety! **Prolift hoists have proven to be sturdy, reliable and road proof.**

An extensive network of Prolift Service points offers nearby assistance and support if needed.

All the same, at Prolyte we have a philosophy of continuous product improvement and we think that even the best can be improved.

Smart, silent and small.

The new Prolift Mark III is a smart, silent and sturdy hoist; the most compact design available on the market.

Design features such as the practical size, integrated handles, IP54 protection; phase-locked protection and zinc coated internal parts make the Prolift Mark III stand out from the competition.

Cast-in routes will guarantee water drainage in both upright and inverted positions whereas improved transmission space guarantees an optimal oil level in both positions. Improvements that will result in a **prolonged lifetime of your hoist, as well as increased safety and reduced maintenance.**

Major product launch for Prolyte.

Introducing the Space Roof.

Infinite modularity in one simple system

Prolyte introduces the Space Roof, a modular roof system based on a space frame structure.

The space frame structure is suspended from standard Prolyte CT towers; a special sleeve block makes the connection to the grid and is designed to accommodate the special grid attachments.

The aluminium profiles combine with special node points to form a roof structure of any desired size or shape.

The Space Roof can be build up to 37 x 22 m in size, with the choice of a flat, curved or tilted shape, thus offering multiple solutions within one system.

The inflatable top canopy guarantees efficient water drainage.

Combining extreme loading possibilities with minor transportation volume

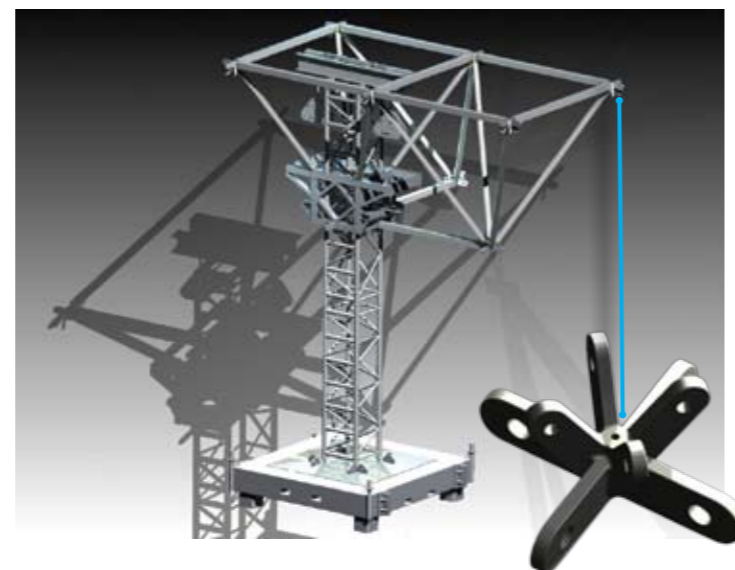

With overall measurements of 20 m height and 35 m span, this roof is one of the largest systems available, acting as temporary concert hall or mother grid. The load bearing capacity is extremely high, reaching up to 50.000 kg.

The grid sizes of 2072 x 2072 mm are in compliance with standard scaffolding systems, but can be supplied in a 2000 x 2000 mm system as well.

Due to the fact that the Space roof is completely modular, huge savings in truck space can be achieved. Once the system is dismantled, the grid components can be stored and transported in compact volumes.

Technical Specifications

- Modular system, extendable in 2072 x 2072 or 2000 x 2000 mm sections
- Integrated M12 hanging points on each interval
- M12 holes in each node point
- Max. Loading 50.000 kg
- Max. PA load 4000 kg
- Max. wind speed 36,9 m/s, 82,5 mph
- Max. Lifting capacity 32 ton – based on 8 tower system
- Aluminium main beams and diagonals - Black anodised
- Pre engineered Steel node points

Recession Buster actions

PROLYTE PRODUCTS

PERMANENT 12% PRICE DECREASE on the Prolift PLE-10 hoist. Starting March 1st 2009.

Real support, real solutions.

What will really help you through difficult times like these?

- No cut backs on our quality.
- No cut backs on service.
- No cut backs on support.

The recession buster action offers **SERIOUS** cut backs on price!

Big action on Big truss.

Rising opportunities

Prolyte has launched of a new sales office in Japan.

The combined Prolyte and Doughty sales office is a branch of Prolyte Asia Pacific.

PAP sees a strategic opportunity to expand its presence in Asia and venture into the world's second largest economy. The Tokyo based office is equipped with a warehouse that stocks a broad range of Prolyte and Doughty products.

Mr. Mutsuo Osawa is appointed as Managing Director for Prolyte Doughty Japan Incorporation (PDJ), who has broad experience in both the entertainment and the advertising industry.

ACF Installation

With the installation of 6 spans of 24 metres B100 truss, the Amsterdam Convention Factory is adapted to meet the higher requirements to house large-scale events or acts.

The Amsterdam Convention Factory is a favourable event location and has housed acts like the Blue Man Group. Amsterdam based company Focus, has installed the B100 truss spans, which will act as mother grid. The installed mother grid will increase the total loading capacity of the hall and the number of rigging points, thereby facilitating more complex productions.
