# Quartzline® Halogen – High Wattage

For your best lighting performance

**SHOWBIZ®**

for stage, studio and television lighting

imagination at work

# Bringing your performance to light.

New GE Showbiz® high wattage Quartzline® halogen lamps have been developed to offer customers a higher level of performance and greater product flexibility.

Developed using GE's Six Sigma process, these lamps encompass the latest halogen technology and highest production standards in the Showbiz® product line.

Available in 10,000 to 24,000 watts and 120, 208, 230 and 240 volt versions.

Quartzline® halogen products offer a wide range of applications in the stage, studio, film and television industry compared to incandescent

- Higher efficiency maintained with optimum chemistry and fill pressures
- Fused silica bulb wall material for reliable containment
- No significant drop of lumen maintenance over life
- High 3200 to 3400 K color temperatures for excellent color rendition
- Smaller lamp size allows for compact fixture designs

## Single-Ended High Wattage Quartzline® halogen with Mogul Bi-Post Base
